

Lunar Yellow Underwing Survey and Moth Morning

Tentsmuir National Nature Reserve

Saturday 24th and/or Sunday 25th August

(NB: The event is happening over two mornings so come to one or both!)

10.00am – 2.00pm

Forestry and Land Scotland's Kinshaldy Car Park

- Tentsmuir is the only site in Scotland where Lunar Yellow Underwing has been seen this century!
- However, that was 12 years ago!
- Come and help set up moth traps the night before (7pm), even bring your own!
- And/or come and see what has been caught the following morning (10am) – we are hopeful of over 100 different species!

Everyone welcome

No previous experience or knowledge required

For more info (or want to help set moth traps in the evening) please contact:
